DETAILED ACTION

Status of Claims

1. Claims 2-5, 8, and 16-18 are pending. Claims 2-5 and 8 are amended and claims 16-18 are added by the amendment, filed 9/28/2007.

Claims 2-5, 8 and 16-18 are under consideration.

Sequence Compliance

2. The nucleotide sequence disclosure contained in this application now complies with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825.

Applicant filed an amendment to the specification and a new sequence listing to correct the sequence compliance issues on pages 8 and 12 of the specification on 9/28/2007.

Claim Objections

3. The objection to claim 1 for reciting "Cx40" without disclosing it as connexin 40 is withdrawn. Applicant added the full disclosure of "connexin 40 (Cx40)" to new independent claim 16, therefore obviating this objection. Therefore, it is withdrawn.

The objection to claim 1 for its use of the term, "locus", is withdrawn. Applicant removed "locus" from all the claims. Therefore, the objection is withdrawn.

The objection to claim 7 for the typographical error, "as cardiac conduction system model", is withdrawn. Claim 7 is canceled and this recitation is no longer present in any of the claims. Therefore, the objection is withdrawn.

The objections to claim 7 and 9 for failing to narrow the scope of that claimed in either of claims 1 or 4 are withdrawn. Claim 7 and 9 are canceled therefore obviating these objections. Therefore, the objections are withdrawn.

Double Patenting

4. The advisory to Applicant for substantially duplicate claims 7 and 9 is withdrawn. Claims 7 and 9 are canceled, therefore, obviating the advisory.

Claim Rejections - 35 USC § 112, 1st Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Scope of Enablement

5. The rejection of claims 1-9, under 35 U.S.C. 112, first paragraph, for lacking enablement for the full breadth of the invention as claimed, is withdrawn.

Applicant amended the claims to adopt the scope disclosed as enabled subject matter as set forth in the Office Action, mailed 3/29/2007. Therefore, the enablement issues have been addressed and therefore the rejection is withdrawn.

Claim Rejections - 35 USC § 112, 2nd Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. The rejection of claims 2-9, under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, is withdrawn.

Claim 2 recited the limitation "the knock-in reporter gene" in 2, which had insufficient antecedent basis. The amendments removed this recitation. Therefore, this issue of indefiniteness has been addressed.

Claims 2-9 recited "a.....mouse according to". Applicant amended the claims to recite "the...mouse according to" or canceled the claims, which obviates this issue of indefiniteness.

Claim 4 recited the limitation "the Cxn protein" in 2, which had insufficient antecedent basis. Amendments removed this recitation, therefore obviating this issue of indefiniteness.

Claims 5 recited "a double eGFP+ allele". Amendments removed this recitation. Therefore, this issue of indefiniteness is addressed.

Claim 6 recited "at least one allele which is inactivated". Claim 6 is canceled, obviating this issue of indefiniteness.

Claim 8 recited the limitations, "the eGFP+ cells" in line 2 and "the anatomical description" in line 3, which had insufficient antecedent basis for these limitations in the claim. Applicant removed these recitations from the claim, therefore addressing this issue of indefiniteness.

Claim 9 recited the limitations, "the GFP images" in lines 1-2 and "the electrical activation maps" in line 3, which had insufficient antecedent basis for this limitation in the claim. Claim 9 is canceled, therefore obviating this issue of indefiniteness.

Therefore, because all the grounds of indefiniteness are addressed by the amendments to the claims, the rejection is withdrawn.

7. No rejections remain of record.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patricia Granados on 2/7/2008.

The application has been amended as follows:

In the specification:

Claim 2, 4, 8, and 18 are canceled.

Claim 3 is rewritten as follows:

3. The transgenic mouse according to claim 16, wherein said reporter gene is an eGFP gene.

Claim 5 is rewritten as follows:

5. A mouse offspring resulting from a mating with the mouse according to claim 3, wherein said mouse offspring is homozygous for said eGFP gene.

Claim 17 is rewritten as follows:

17. The transgenic mouse of claim 16, wherein the mouse is homozygous for said fluorescence reporter gene.
